

How Can I Reduce High Blood Pressure?

and do something you enjoy, like taking brisk walks or riding a bicycle.

Aim for at least 150 minutes of moderate-intensity or 75 minutes of vigorous-intensity aerobic physical activity (or a combination of both) per week. Talk to your health care professional about a good plan for you.

What should I know about medication?

Depending on your risk and blood pressure levels, you may need one or more types of medication to keep your blood pressure at a healthy level. You may need a trial period before your doctor finds the best medication, or combination of medications, for you.

What's most important is that you take your medication exactly as prescribed. Never stop treatment on your own. If you have problems or side effects from your medication, talk to your health care professional.

HOW CAN I LEARN MORE?

- 1 Call 1-800-AHA-USA1 (1-800-242-8721), or visit [heart.org](https://www.heart.org) to learn more about heart disease and stroke.
- 2 Sign up for our monthly *Heart Insight* e-news for heart patients and their families at [HeartInsight.org](https://www.heartinsight.org).
- 3 Connect with others sharing similar journeys with heart disease and stroke by joining our Support Network at [heart.org/SupportNetwork](https://www.heart.org/SupportNetwork).

Do you have questions for your doctor or nurse?

Take a few minutes to write down your questions for the next time you see your health care professional.

For example:

Can I drink any alcohol?

How often should I check my blood pressure?
